THIS IS UNEVALUATED INFORMATION

25X1

Furnaces of an undetermined design were built by a Breslau and a Krakow firm for the construction of industrial furnaces in a workshop of Huta Lenina at Nowa Huta near Krakow. These furnaces were built according to Soviet designs and had combustion chambers measuring 8 x 4 x 3 meters. The furnaces were designed for the production of refractory materials as required for blast furnaces and open-hearth furnaces. These furnaces were to develop a temperature of 1,400°C. Their construction was supervised by Soviet engineers. In August 1953, new workshops were also being erected at Huta Lenina.
